Caleb Green

Charlotte, NC | 704-706-4357 | calebrobertgreen@gmail.com | cgree147.github.io | linkedin.com/in/calebrobertgreen | kaggle.com/crgreen01

Professional Profile

Management Information Systems graduate with a 3.9 GPA and a Google Professional Certification in Data Analytics. Experienced in architecting end-to-end cloud data pipelines on AWS and transforming raw, complex datasets into actionable business intelligence through SQL, Python, and Power BI. Proven track record in conducting large scale ETL processes, database normalization (3NF), and developing executive level dashboards to drive decision making.

Education

University of North Carolina at Charlotte | Charlotte, NC *Dec 2025*
Bachelor of Science in Information Systems | GPA: 3.9 / 4.0

Certifications

Google Data Analytics Professional Certificate | Google Cybersecurity Professional Certificate | IBM Data, IT & Cybersecurity Fundamentals | CompTIA Security+ (Candidate - Expected May 2026)

Technical Skills

- **Programming & Databases:** SQL (Advanced Querying, Joins, CTEs), Python (Pandas, NumPy, SQLAlchemy, Scikit-learn), R (Tidyverse), PostgreSQL, Microsoft Access.
- **Cloud & Data Engineering:** AWS (S3, RDS), ETL Pipeline Development, Star Schema Design, Data Normalization (3NF), Exploratory Data Analysis (EDA).
- **Data Visualization & BI:** Power BI, Tableau, Excel (Pivot Tables, VLOOKUP, Power Query), KPI Development.
- **Tools & Environment:** GitHub, VS Code, Jupyter Notebooks, Google Colab, Google Analytics.

Technical Projects

Automated Cloud Data Pipeline & Retail Analytics */ Python, SQL / AWS (S3, RDS) / Python (Pandas, SQLAlchemy) / PostgreSQL / Power BI*

- Architected a multi-stage ETL pipeline to automate the extraction of retail datasets from AWS S3 into a centralized PostgreSQL (RDS) cloud warehouse.
- Engineered a Python-based transformation layer to normalize flat CSV data into a Star Schema (3rd Normal Form), significantly improving query performance and data integrity.
- Developed automated validation scripts using Pandas to remediate missing values and inconsistent formatting, ensuring 100% data accuracy for downstream reporting.
- Built an interactive Power BI dashboard connected to the cloud warehouse to visualize seasonal sales trends and analyze macroeconomic correlations.

Sales Insights & Trend Analysis */ Walmart Case Study*

- Cleaned and transformed a 600k+ row retail dataset using Python (Pandas/NumPy), achieving 99%+ accuracy by remediating significant data inconsistencies.
- Deployed a Power BI dashboard enabling store and department-level revenue drill-downs across 45 locations

Operational Database Design */ McDonald's Simulation*

- Led a 4-person team to architect a relational database, normalizing 15+ tables to ensure referential integrity for sales and inventory tracking.
- Leveraged SQL to generate complex reports on supplier performance and revenue trends for operational oversight

Smart Device Behavioral Analysis */ Bellabeat*

- Merged and analyzed diverse Fitbit datasets using R (Tidyverse) to identify correlations between activity levels and health outcomes.
- Delivered data-backed marketing recommendations, including usage-based incentives and notification timing optimizations.

Professional Experience

Data Analyst Intern Simulation */ TDS Telecommunications LLC, UNCC* *May 2025 – July 2025*

- Delivered 10+ custom SQL-driven reports, transforming raw relational data into standardized metrics for stakeholder decision-making.
- Partnered cross-functionally to define requirements and implement new **database objects**, improving data accessibility and BI reporting efficiency.
